This handout includes the following activities to use with the video and song.

1. Spelling list
2. Match words to pictures, reading written words, and/or labeling items in pictures
3. Simple life cycle visuals - print, cut into pieces, color, and arrange in the right order
4. Verbal list describing the life cycle of plants

LYRICS / letras

*First there's a seed. Give it water.
Wait a few days, or maybe a week.
Watch it sprout, grow taller and taller,
And grow leaves, fruit, seeds, and a flower.*

*The seed falls on the ground.
Now it's a baby plant.
That's the life cycle of a plant.*

Spelling Words List

1. seed
2. water
3. leaves
4. fruit
5. flower
6. ground
7. plant
8. life
9. cycle

Match Words and Pictures - print, cut out, and match

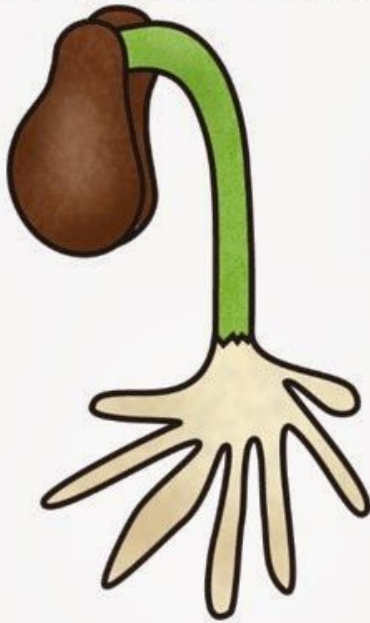

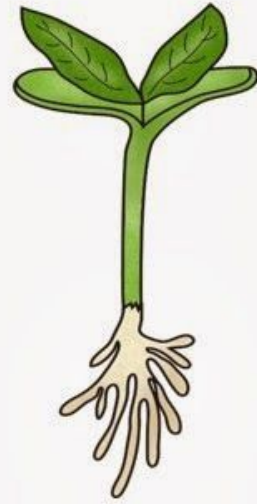

fruit

seeds

flower

leaves

1. Seed
2. Seed sprouts
3. Seedling

Life Cycle of a Plant

1. A seed falls on the ground.
2. The seed germinates - that means it starts to grow.
3. The seed grows roots and a stem. It is called a seedling. A seedling is a baby plant.
4. The roots grow into the ground. The stem grows up to the sky.
5. The seedling grows two leaves.
6. The seedling grows taller and taller.
7. The seedling is not a baby anymore. It is a plant.
8. The plant grows flowers.
9. The flowers make new seeds.
10. The seeds fall on the ground and it starts again at step one!
